

VARDHAMAN COLLEGE OF ENGINEERING (AUTONOMOUS)

Shamshabad– 501 218, Hyderabad

**New crop quinoa mobilization for cultivation in adopted villages by providing free seeds,
20. Oct. 2016 to 22. Dec. 2016**

The community not only deals with technocrats and students, it also linked with farmers specially in India , from where we can learn the human values and ethics very prominently linked with earth and environment. If the farmer is happy in terms of financial resources the country will be more economical. In this regard to make them financial stability in collaboration with agricultural university , the quinoa crop promoted which is having high nutrient values and health concern. Which also needs less water and gluten free millet. Seeds are given free to farmers in adopted villages with promise of promoting cultivation techniques and marketing of the products. Also train them value added products.
